

### Box Challenge

Write the digits 1 through 8 in the boxes. No consecutive digits must be placed next to each other, for example:

### Stick Puzzle

Move 6 sticks to form 5 squares.

## Coin Puzzle

Take six coins and arrange them in a triangle. Your goal is to rearrange the coins into a hexagon in four moves. Each move consists of sliding a single coin to a new location. The new location must be touching at least two other coins at each step.
